- 1.2 ----- Why Use a Pavement Management System?
- 1.3 ----- How Does a Pavement Management System Work?
 - 1.3.1 ----- Decision Trees

Section 2 – Preventive Maintenance

- 2.1 ----- Typical Management Practices That Exist in Everyday Life
 - 2.1.1 ----- Maintaining Roadways
 - 2.1.2 ----- Maintaining Drainage
- 2.2 ----- “Best-First” Approach to Managing Pavements
- 2.3 ----- Balanced Investment
- 2.4 ----- Why Timing is Critical
 - 2.4.1 ----- Delays in Maintenance are Costly
 - 2.4.2 ----- Cost of Delaying Maintenance
- 2.5 ----- Illustration of Cost and Mileage Associated with Different Repair Strategies
- 2.6 ----- Benefit of Life Extension

Section 3 – Repair Strategies & Repair Alternatives

- 3.1 ----- Repair Strategies
- 3.2 ----- Repair Alternatives
- 3.3 ----- Alternate Repair Techniques

Section 4 – Pavement Management Systems

- 4.1 ----- PMS Process
 - 4.1.1 ----- Network Level
 - 4.1.2 ----- Project Level
- 4.2 ----- PMS Database: 3 types of Information
 - 4.2.1 ----- Road Inventory
 - 4.2.2 ----- Pavement Condition Survey
 - 4.2.3 ----- Repair Strategies
- 4.3 ----- Repair Alternatives
- 4.4 ----- Data Analysis
 - 4.4.1 ----- Single-Year Prioritization
 - 4.4.2 ----- Multi-Year Prioritization
- 4.5 ----- PMS Software Reports
 - 4.5.1 ----- Charts
 - 4.5.2 ----- Graphs
 - 4.5.3 ----- Tables

Section 5 - Conclusions

- 5.1 ----- What a PMS Can Do.
- 5.2 ----- What a PMS Cannot Do.

Appendix A - Glossary of Repair Alternatives
